M-AIS LEARNING

Training is essential for a successful transition to any new technology or working methodology, at Managed AIS we provide our clients with the training required to become more productive within the AIM environment.

Our training specialists share their own expert knowledge and experience to ensure that each course achieves positive results. Training delivery methods available for these courses are in-person or on-line with video and instructor-led sessions.

AIM TRAINING CATALOGUE

AIM TRAINING COURSE CATALOGUE

MAIS Learning is the culmination of a multi-year project to create contemporary content for AIM subjects that meets the needs and changing demands on AIS and AIM Staff today. Course material are constantly being revised with an increased focus on the practical application of AIM theory.

MAIS Learning - MAIS Training has become part of a larger learning initiative called MAIS LEARNING. The new initiative incorporates new training

branches and offers a central AIM Learning LMS so that delegate progress and the training information is readily available. The course material is available for you to access at your convenience, but there will be scheduled class meetings - your trainer will publish arrangements for these on the course page. It is vital for your learning experience that you complete the required material prior to any scheduled event.

All Courses Available - In Person (MAIS Site) ; On-Site (Client Site) ; Online with Completion Allowance

DOMAINS: AIM | AIP | CHART | AIXM | PBN
