2020-2021**

### M-AIS LEARNING

Training is essential for a successful transition to any new technology or working methodology, at Managed AIS we provide our clients with the training required to become more productive within the AIM environment.

Our training specialists share their own expert knowledge and experience to ensure that each course achieves positive results. New for 2020 training is available for this course Online with Video and Instructor-led sessions.

# AIM TRAINING 2020

## COURSE CATALOGUE

**MAIS Learning** is the culmination of a 3 year project to create contemporary content for AIM subjects that meets the needs and changing demands on AIS and AIM Staff today. Course material are constantly being revised with an increased focus on the practical application of AIM theory.

**MAIS Learning new for 2020** - Starting in 2020 MAIS Training will become part of a larger learning initiative called MAIS LEARNING. The new initiative will incorporate traditional and new training branches using remote and blended training for 2020 and 2021, with some courses being introduced with self directed portions and eventually the whole course. The course material will be available for students to review at their convenience following blended sessions, and there will be self directed sections available throughout the course allowance period. Prerequisite material will be available prior to any scheduled event and update assessments, quizzes and reward stages shown throughout the course.

**All Courses Available - In Person (MAIS Site) ; On-Site (Client Site) ; Online with Completion Allowance**

DOMAINS: AIM | AIP | CHART | AIXM | PBN
